

# Features of DarshanEase – Temple Darshan Ticket Booking System

The **DarshanEase – Temple Darshan Ticket Booking System** provides a simple, secure, and user-friendly platform for devotees to book temple darshan tickets online. The major features of the system are as follows:

## 1. User Registration and Authentication

The system allows devotees to create an account, log in securely, and access personalized services. Authentication ensures that only registered users can book darshan tickets and manage their profiles.

## 2. Temple Information

Users can browse a list of registered temples along with details such as temple name, location, description, darshan timings, facilities, and available services.

## 3. Darshan Slot Availability

The application displays available darshan slots for each temple, including the date, time, available seats, and ticket price. Slot availability is updated automatically whenever a booking is made or cancelled.

## 4. Temple and Slot Selection

Devotees can select their preferred temple and choose a convenient darshan date and time slot based on availability.

## 5. Online Ticket Booking

The system enables users to book darshan tickets by selecting the desired slot and specifying the number of devotees. Booking details are stored securely in the database.

## 6. Secure Online Payment

DarshanEase integrates with an online payment system that allows devotees to complete ticket payments securely. The system records payment status and transaction details.

## 7. Booking Confirmation

After successful payment, the system generates a booking confirmation containing the booking ID, temple details, darshan date, selected time slot, and payment information. Users can download or print the confirmation for future reference.

## **8. Booking History**

Registered users can access their booking history to view previous and upcoming darshan bookings. They can also check booking status and ticket details from their profile.

## **9. User Profile Management**

Users can manage their personal information, update contact details, and securely change their passwords through the profile section.

## **10. Temple Management**

Temple organizers or administrators can add new temples, update temple information, manage darshan schedules, and upload temple images through the administration panel.

## **11. Darshan Slot Management**

Administrators can create, modify, or remove darshan slots, set ticket prices, define seat limits, and monitor slot availability in real time.

## **12. Admin Dashboard**

The system provides an administrator dashboard to manage users, temples, bookings, payments, darshan slots, and overall system activities. Administrators can also monitor booking statistics and user information.

## **13. Reports and Analytics**

DarshanEase generates reports related to bookings, temple popularity, payment transactions, and slot utilization. These reports help administrators analyze system performance and improve temple management.

## **14. Secure Database Management**

All user information, temple details, bookings, payments, and darshan schedules are stored securely in the database with proper validation and authentication mechanisms to ensure data integrity.

## **15. Responsive and User-Friendly Interface**

The application is designed with a responsive interface that provides a smooth experience across desktops, tablets, and mobile devices, making online darshan ticket booking convenient for all users.
