

Roles and Responsibilities

The **DarshanEase – Temple Darshan Ticket Booking System** defines three primary roles: **User (Devotee)**, **Organizer**, and **Admin**. Each role has specific responsibilities to ensure smooth operation of the application.

1. User (Devotee)

Registration

Devotees can create an account by providing their personal details such as name, email address, phone number, and password. Registered users can securely access all features of the application.

Login and Authentication

Users can log in securely using their registered credentials to access temple information, book darshan tickets, and manage their accounts.

Profile Management

Users can view and update their personal information, including name, email, phone number, address, and password.

Temple Browsing

Users can browse the list of available temples, view temple details, darshan timings, facilities, and ticket availability before making a booking.

Darshan Slot Booking

Users can select their preferred temple, choose an available darshan slot, specify the number of devotees, and book tickets online.

Payment

Users can securely complete online payments for darshan ticket bookings through the integrated payment system.

Booking History

Users can view their previous and upcoming bookings, along with booking status and ticket details.

Feedback

Users can provide feedback and ratings based on their darshan experience, helping improve temple services.

Logout

Users can securely log out of the DarshanEase application after completing their activities.

2. Organizer (Temple Organizer)

Profile Management

Temple organizers can manage and update their personal profile information, including contact details and login credentials.

Temple Management

Organizers can add new temples, update temple information, upload temple images, and maintain temple-related details.

Darshan Slot Management

Organizers are responsible for creating, updating, and managing darshan slots, including dates, timings, ticket prices, and seat availability.

Booking Management

Organizers can monitor all bookings made for their temple, verify booking details, and manage slot availability accordingly.

Notification Management

Organizers receive notifications regarding new bookings, cancellations, and important updates to ensure efficient coordination.

Reports

Organizers can view booking statistics, slot occupancy, and daily booking reports for better temple management.

Logout

Organizers can securely log out of the DarshanEase system.

3. Admin

System Management

The administrator has complete control over the entire DarshanEase application, including system settings, security, and overall platform management.

User Management

Admins can create, update, deactivate, or delete user accounts and monitor user activities within the application.

Organizer Management

Admins can approve, update, or remove organizer accounts and assign management responsibilities to authorized temple organizers.

Temple Management

Admins can add, edit, or remove temple information and verify temple details before making them available to users.

Darshan Slot Management

Admins can monitor and manage darshan slots across all temples to ensure accurate scheduling and availability.

Booking and Payment Management

Admins can view all booking records, monitor payment transactions, handle booking cancellations, and resolve payment-related issues.

Reports and Analytics

Admins can generate reports on temple bookings, revenue, user registrations, slot utilization, and other system statistics to support decision-making.

System Monitoring

Admins monitor overall system performance, maintain database integrity, and ensure secure operation of the application.

Logout

Admins can securely log out of the DarshanEase system after completing administrative tasks.
